

Amendments to the Specification

Please replace the paragraph at page 10, line 1 to page 11, line 10 with the following amended paragraph:

A design 130 symbolizing an animal (little bear) on an airplane is printed in the central portion of the base sheet 111. A sheet 111a having the design 130 drawn thereon has a perforated line 131 made by perforations along its outer periphery so as to be capable of being peeled off from the plane fasteners 112a and 112b as shown by an arrow Y2, while leaving the outline portion of the base sheet 111 behind, as shown by a perspective view of FIG. 6 and by a cross-sectional view of FIG. 7. The sheet 111a as peeled off serves as a kind of sticker and is used for the intellectual education of an infant wearing the diaper, or as a toy to be played with.
